PSV Values

At PSV, we strive to provide exceptional service to our patients their families, and all other valued stakeholders. We accomplish this by incorporating our core values of C.A.R.E. (Compassion, Advocacy, Redefining Healthcare, and Excellence), across our organization, with the goal of making every encounter perfect.

Service excellence is vital to our organizational and individual success. PSV staff members work to *Make It All Better* for our patients and their families, because at **PSV WE CARE...**

Compassionate team of
Advocates for our patients,
Redefining healthcare, by bringing
Excellence to pediatric specialty care.

Our Mission

To provide high-quality pediatric specialty care to the children of Virginia through clinical excellence, innovation, education, research, and family-centered care.

Our Vision

To create a culture of health and wellness in a patient-centric, physician-led model of care while integrating the strengths from two premier organizations.

Community Outreach

Washington Capitals Visit PSV's Center for Cancer and Blood Disorders

The Capitals players took the time out of their day to sign autographs, take photos, and speak with our patients, families, and staff members as part of their #CapsFightCancer initiative in conjunction with the NHL's #CancerAwareness month.

Gluten-Free Education Classes

PSV partnered with Children's National Health System to host gluten-free education classes for children and families on "Navigating the Grocery Store in Gluten-Free Style" seminar.

PSV's RX for Food Program: In 2018, PSV Infectious Diseases team, led by Katherine Moyer, DO, Shineca Solomon, BSN, RN, and Pamela Jimenez, CMA, piloted a program along with a few other specialties to screen patients for food insecurity. Food insecurity is defined as limited or uncertain access to enough food. PSV joined local physician, Fred Garner, MD of Burke Pediatrics, and partnered with a local food pharmacy, Food for Others to provide emergency food to families. Food for others also screens families to see if they are eligible for monthly food supplementation through a USDA program. In 2018, 187 PSV families (14% of those that completed the screening) were positive for food insecurity and provided with information to connect with Food for Others. 54 of those families went to Food for Others and 47 qualified for the USDA Program.

Pulmonary Medicine

Rheumatology

Urology

Allergy and Immunology

Experts in understanding the unique ways that allergies and immunology disorders affect children.

Common allergic and immunologic conditions we treat include (but aren't limited to):

- Asthma (allergic, non allergic, and exercise induced)
- Allergic/non allergic rhinitis
- Chronic sinusitis
- Hives
- Eczema
- Angioedema
- Drug and food allergies
- Chronic respiratory infections
- Latex allergy
- Stinging insect allergy
- Recurrent infections
- Primary immune deficiencies
- Comprehensive evaluation and management for children with immune deficiencies

We offer a full spectrum of outpatient services for children and their families, such as:

- Allergy shots
- Asthma education and management plans
- Consultations
- Drug allergy testing
- Drug challenges
- Food allergy management plans
- Oral food challenges
- Pulmonary function testing
- Skin testing

Thank you for the terrific care. We're so happy to have your help!

Our Allergy and Immunology Specialists

Darlene Mansoor, MD
Medical Director of Allergy and Immunology

Supriya Jain, MD
Robyn Morrissette, PA-C

4.7 out of 5

2018 Division Achievements:

-250 Food Challenges in 2018

Food Challenges are a medical procedure in which a food is eaten slowly, in gradually increasing amounts, under medical supervision, to accurately diagnose or rule out a true food allergy.

-100% Penicillin Allergy Removal - All patients with a prior penicillin allergy are confirmed and tested not to have a penicillin allergy.

Quality Improvement Initiatives:

-Treatment efficacy assessment- Patients receiving allergen immunotherapy should be evaluated within 12 months.

-Assessment of Asthma Symptoms Prior to Administration of Allergen Immunotherapy Injection(s)

Ambulatory Surgery Center

Outpatient surgery in a family-centered, child-focused setting

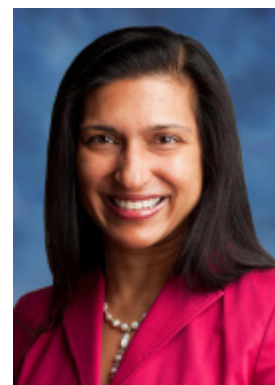

The **Ambulatory Surgery Center (ASC) of PSV** brings the expertise of surgical specialists from our area's world class pediatric institutions to a child-centered, convenient, outpatient surgery center in Northern Virginia.

We are experts in outpatient surgery just for children. Every procedure is staffed by a fellowship trained pediatric anesthesiologist with years of experience providing anesthesia care exclusively for children.

Awards/Recognitions:

The AAAHC is the leader in ambulatory health care accreditation as they have set the bar for developing standards to advance and promote patient safety, quality and value for ambulatory health care through peer-based accreditation processes, education, and research.

Our Ambulatory Surgery Center Specialists

Rupa Dainer, MD
Medical Director of Ambulatory Surgery Center and PSV Chief Surgical Officer

Ramesh Patel, MD
Janish Patel, MD
Sarah Reece-Stretman, MD
Teodoro Reyes, MD
Teresa Roberts, MD
Domiciano Santos, MD
Janelle Vaughns, MD

Developmental Pediatrics

Comprehensive care for children and adolescents with neurodevelopmental disorders, including cognitive, motor, social, and behavioral needs

The Developmental Pediatrics team at PSV has unique expertise in caring for children with impairments of typical brain function that often impact their behavior, memory, and ability to learn.

Conditions evaluated and supported by our team include:

- Attention deficit hyperactivity disorder
- Autism spectrum disorders
- Communication disorders
- Developmental coordination disorders (dyspraxia)
- Developmental delays
- Down syndrome
- Fetal alcohol syndrome
- Problems at school
- Learning disabilities
- Behavioral problems
- Sleep difficulties

To accurately diagnose and treat your child's condition, we evaluate gross and fine motor skills, speech and language abilities, and social skills using several types of evaluations, such as:

- Developmental and cognitive evaluations
- Educational evaluations
- Neuropsychological evaluations (understanding the link between physical brain function and psychology)

Aug 13, 2018

The doctors and staff are genuine and really had concern for my daughter. The doctors really have a way with children. They made my daughter comfortable enough to open up. I felt she was in good hands.

4.8 out of 5

204 Ratings

Quality Improvement Initiatives:

- 30 Day follow up care for patients being treated for ADHD
- 2 additional follow up within 10 month period for patients being treated for ADHD
- **Initiation Phase:** Assesses children 6-12 years of age who were diagnosed with ADHD and had one follow-up visit with a practitioner with prescribing authority within 30 days
- **Continuation and Maintenance Phase:** Assesses children 6-12 years of age who had a prescription for ADHD medication and remained on the medication for at least 210 days.

Endocrinology

Comprehensive care in one convenient location.

Diabetes and Endocrinology at PSV includes some of the region's top pediatric endocrinologists, including Rinku Mehra, MD, the director, who has been named as one of Northern Virginia Magazine's Best Doctors of 2018 list. In addition, the team offers a wide range of expertise in pediatric endocrinology, including psychological support.

The team features child-focused expertise in all areas of pediatric endocrinology, especially disorders associated with:

- Growth
- Puberty
- Thyroid gland
- Adrenal gland
- Sex differentiation
- Glucose metabolism (diabetes mellitus/hypoglycemia)
- Bone and mineral metabolism
- Water metabolism (diabetes insipidus)
- Pituitary/hypothalamus
- Menstrual irregularities

Available treatments and services:

- Diabetes education
- Psychological support
- Initiation and monitoring of insulin pump treatment
- Initiation and monitoring of Continuous Glucose Monitoring Systems

Our Diabetes and Endocrinology Specialists

- Rinku Mehra, MD
Medical Director of Endocrinology
- Oksana Lazareva, MD
- Kathleen Link, MD
- Otilia Neacsu, MD
- Mia Pingul, MD
- Lindsey Waldman, MD
- Karen Harriman, NP
- Haley G. Smith, CPNP-PC

Quality Improvement Initiatives:

- Type1 Diabetes Blood Sugar Control
- Type 1 Diabetes Eye Exam assessment
- Type 1 Diabetes LDL measurement
- Type 1 Diabetes follow up care
- Depression Screening
- Diabetes related hospitalization

Gastroenterology, Hepatology, and Nutrition

A comprehensive team approach to Gastroenterology, Hepatology, and Nutrition for children

Families who come to PSV for treatment of stomach, liver, and nutritional issues have access to:

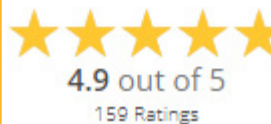

- Full spectrum of care
- Expertise in diagnosis
- Specialized care
- Child-centered environment

The team offers many common treatments for a wide variety of gastrointestinal problems:

- Anorectal and esophageal manometry
- Breath hydrogen testing
- Dilation (Achalasia pneumatic, esophageal, pyloric, rectal), including Botox injections
- Colonoscopy
- Endoscopy (Upper, video capsule, treatment of gastrointestinal bleeding)
- Esophageal varices treatments (sclerotherapy and banding)
- Flex sigmoidoscopy
- Foreign body removal
- Pancreatic function testing
- Percutaneous endoscopic gastrostomy (PEG) tube placement and care
- pH probe/impedance
- Polypectomy
- Rectal suction biopsy
- Single balloon enteroscopy

Specialized Clinics for Complex Conditions

- Inflammatory Bowel Disease (IBD) Clinic
- Enteral Feeding (GTube) Clinic
- Eosinophilic and Autoimmune Gastrointestinal Disorders Clinic
- Harmony Clinic

Our Digestive and Liver Disorder Specialists

Ian Leibowitz, MD
Medical Director of Gastroenterology, Medical Director of PSV

- Catherine Chao, MD
- Grace Felix, MD
- Stefany Honigbaum-Garrity, MD
- Suchitra Hourigan, MD
- Muhammad Khan, MD
- Peter Lee, MD
- Otto Louis-Jacques, MD
- Natalie Sikka, MD
- Jaime Liou Wolfe, MD
- Teresa DeSanctis, NP
- Bernadette Diez, FNP-C
- Jessica Stafford, PNP-C

2018 Division Achievements:

- Complex GI endoscopy program
- Harmony Clinic – Neurology, Gastroenterology, Nutrition, and Physical Medicine and Rehab.

Genetics

Personalized care for children with genetic disorders

Advanced technologies to understand the causes and triggers for many genetic syndromes and disorders – including the rare ones.

These technologies also allow multi-disciplinary genetics care teams like ours at Pediatric Specialists of Virginia to identify and treat these disorders earlier in a child’s life, which can positively impact that child’s health and well-being immediately and long-term.

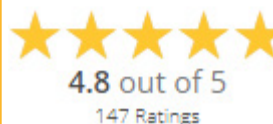

Convenient access to genetics experts

The PSV Genetics service connects families with a comprehensive healthcare team that includes nationally recognized geneticists. Each family works closely with a genetics counselor who coordinates with the child’s primary care doctor and other care team physicians to identify the genetic testing and treatment services that will work best. The goal is to provide a broad spectrum of care for families to fit the medical and emotional needs of the child.

One of the largest pediatric clinical genetics programs in the country.

Genetic evaluations and testing are available for variety of conditions, including:

- Birth defects
- Down syndrome
- Genetic disorders of all types
- Lysosomal storage disorders
- Neurofibromatosis
- Skeletal dysplasias
- Cardiac genetics
- Genetic syndromes
- Adult genetic conditions
- Chromosomal abnormalities
- Unexplained developmental delay
- Hearing loss
- Neuromuscular disorders

2018 Achievements:

Lysosomal Storage Disorder Infusion Clinic

Nov 20, 2018

The doctor was extremely patient, knowledgeable, caring and sensitive. I thought that all of my questions were answered. I felt very listened to and understood, and I felt that I clearly understood the next steps in the process and what I needed to do, and who I could contact for more information, and possible additional procedures or tests or anything, if I wanted to know more about that, I knew who I could contact, and I really appreciated the patience and sensitivity in dealing with an important medical concern for me. Overall, just incredibly nice experience and I would recommend my doctor to anybody.

Hematology and Oncology

Nationally recognized for premier care in childhood Hematology and Oncology

Ranked among the best in the nation by U.S. News and World Report

There are only a few pediatric cancer and blood disorder programs in the country that offer the specialized expertise in the childhood forms of these diseases that PSV does. The team develops an integrated care plan for each family that allows them to visit one location and access all the services they need. This makes us a true medical home for children undergoing treatment for cancer and blood disorders in northern Virginia.

Common conditions we treat include:

Leukemia/Lymphoma

Brain tumors

Cancers of the liver, kidney, bone, and muscle

Sickle cell disease

Thalassemia

Immunologic disorders

Metabolic diseases

Program/Services:

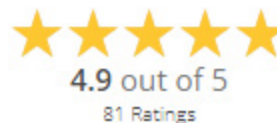

Novel treatments available through clinical trials from the Children’s Oncology Group—the nation’s biggest network of childhood cancer research.

Onsite laboratory provides patients and families with immediate access to tests and testing results, including blood counts and blood chemistry.

Dedicated sickle cell and hemophilia programs

Patients with blood disorders such as sickle cell disease, thalassemia, and hemophilia are cared for by a multi-specialty team from physicians to nurses and social workers with extensive experience caring for children with these disorders.

Immediate consultations: Hematology and oncology specialists are available 24 hours a day for onsite or telephone consultation with referring physicians and hospitals across the Washington, DC, metro area

Our Cancer and Blood Disorder Specialists

Christopher Lawlor, MD
Medical Director of Hematology and Oncology

- Jennifer Dean, MD
- Robin Dulman, MD
- Niccole Piguet, MD
- Marshall Schorin, MD
- Carly Varela, MD
- Elizabeth Yang, MD, PhD
- Nupur Gupta, PsyD
- Lauren Godby, CPNP-PC
- Angela Lewis, NP
- Alisa Perry, NP
- Alissa Mills, PA-C
- Kathleen Scarbalis, PA-C

Quality Improvement Initiatives:

- Standard nursing order set for oral hygiene for patients being admitted for planned chemotherapy
- Inpatient Physical Therapy Guidelines
- Guidelines for each subset of patients (Solid tumor, leukemia, sickle cell)
- “Plan of Care” notes for patients with inpatient
- Physical Therapy orders
- Post ER visit follow up

They are excellent at taking care of the children and they were concerned about the health of my daughter. They were cordial and they treated me very well to explain my baby's condition. I am very grateful for the explanation that the doctor gave me and the plans to follow.

Infectious Diseases

Dedicated expertise in childhood infectious diseases

The PSV Infectious Diseases service is the only infectious disease practice dedicated exclusively to children located in northern Virginia.

The experts at PSV are available whenever needed, often including same-day consultations or hospital admissions, if necessary.

Our infectious diseases experts have a broad range of experience with many common (and not so common) childhood infectious diseases, including:

- Bone and joint infections
- Complicated/complex pneumonia
- Congenital (at birth) infections
- Oropharyngeal infections
- Periodic fevers
- Prolonged fevers
- Staphylococcal infections
- Streptococcal infections
- Tick-borne infections
- Tuberculosis

Travel-Related Infections:

- Chagas disease
- Dengue
- Malaria
- Other emerging infections
- Typhoid

Our Infectious Disease Specialists

Rebecca Levorson, MD
Medical Director of Infectious Disease

Lyuba Gitman, MD
Daniel Keim, MD
Andrew Nuibe, MD
Katherine Moyer, DO

Quality Improvement Initiatives:

- Increase influenza vaccination PSV wide
- Expand influenza vaccination to off-site clinics.
- Rx for Food

Get Smart About Antibiotics Week

November 13, 2018 PSV's Infectious Diseases team hosted a popcorn giveaway event in recognition of U.S. Antibiotic Awareness Week (November 12-18).

Dr. Levorson exemplifies what it means to be a doctor! She really listens , gathers all history & labs and makes the patient/ parent feel so comfortable. She is a special light in medicine currently!! Thank you

Nephrology and Hypertension

Comprehensive care for children with kidney disorders

The team of specialists in Kidney Disorders and Hypertension at PSV offers the only child-focused nephrology practices in northern Virginia.

This full-service program offers diagnosis, treatment, and rehabilitation of infants, children, and adolescents with nearly every kidney disorder and related complications, including (but not limited to):

- Blood and/or protein in the urine
 - Chronic urinary tract infections
 - Bedwetting
 - Pediatric hypertension
 - Kidney stones
 - Renal insufficiency
 - Congenital nephrologic and urologic abnormalities/disorders
 - Renal failure
- Families have access to a unique set of pediatric focused support services.

Preventive care programs:

- Prenatal counseling
- Integrated care: The team works closely with colleagues including urology, gastroenterology, endocrinology, and cardiology to address the needs of children with multiple disorders in one location.
- Renal sonography
- Ambulatory Blood Pressure Monitoring (ABPM)
- Urinalysis
- Transplantation
- Immediate consultations

Our Kidney Disorders and Hypertension Specialists

Robert Fildes, MD
Medical Director of Nephrology

Rasheda Amin, MD
Randala Lakkis, MD
Davoud Mohtat, MD
Patricia Seo-Mayer, MD

Quality Improvement Initiatives:

- Ambulatory Blood Pressure Monitoring
- Assessment of Pneumococcal vaccine for nephrotic patients.
- Counseling of female adolescents on ACE inhibitors regarding adverse effects.

Dec 12, 2018

Dr. Fildes was an excellent doctor, he asked a lot of questions, and he was very respectful and gave a lot of time to my son for his exam, but he was very thorough. Thank you.

Neurology

Expertise in childhood neurological conditions

The board certified Neurologists at PSV have the expertise to evaluate and treat a wide range of neurological conditions in children, including:

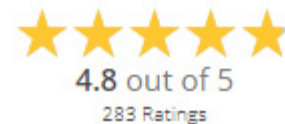

- Gliomas
- Blastomas
- Pharyngiomas
- Epilepsy and movement disorders
- Chiari malformation
- Cerebral palsy and spasticity
- Febrile seizures
- Multiple sclerosis
- Developmental delay
- Autism
- TICS
- Neurogenetic conditions, including seizures with neurogenetic focus
- Neuromuscular conditions

Our Neurology Specialists

William McClintock, MD
Medical Director of Neurology

- Taeun Chang, MD
- Lucy Civitello, MD
- Raquel Langdon, MD
- Tarannum Lateef, MD
- Bennett Lavenstein, MD
- Thanh T Nguyen, MD
- John Schreiber, MD
- Thuy-Anh Vu, MD
- Terry Watkin, MD
- Neha Athale, FNP-BC
- Ashley Gerami, NP
- Megan McInnis, NP
- Akilah Mikel, FNP

Quality Improvement Initiatives:

- Epilepsy discharge safety instruction
- Safety & effectiveness of headache infusions
- Reduction of ED visits newly diagnosed Seizures

Dr. McClintock was very nice and he spent a lot of times with us, and I really appreciate that. He gave us very good advice of what to do with my daughter. I think we really would recommend everyone to Dr. McClintock for neurology. So I will really really recommend Dr. McClintock. He's a very good doctor and spent a lot of time with us. Thank you.

Neurosurgery

Outpatient neurological care at PSV is comprehensive and based on the needs of the child.

Multi-specialty clinics

Multi-Specialty Concussion Clinic: A one-stop clinic for children with concussions.

PBI Clinic – The Perinatal Brain Injury Clinic is a joint multidisciplinary clinic with neonatal neurology, pediatric physical medicine and rehabilitation and physical therapy for our neurologic patients with cerebral palsy.

Tuberous sclerosis Clinic: A multi-specialty clinic offering a wide range of services for children with tuberous sclerosis.

Treatments and services available:

Neurologic evaluations

Assessments

Prescription management

Pediatric electroencephalography (EEG)

Baclofen pump

Patient and family education and support

Children with brain and spinal cord disorders who are treated at PSV also have access to local and national research protocols and clinical trials, as well as one-stop, multidisciplinary specialty clinics and child- and family-focused patient support groups, all conveniently located in northern Virginia. These services provide an extra layer of tailored emotional and clinical support for children with neurological conditions and their families.

Our Neurosurgery Specialists

Leon E. Moores, MD, DSc
Medical Director of Neurosurgery and CEO

Peggy Vollstad, PA-C

Felt that Dr. Moores really listened to what I had to say, addressed my concerns, and was just very, very caring and very personable and just made me feel really comfortable with what we were there for and I greatly appreciated the time he spent with us.

Ophthalmology

Expertise in pediatric ophthalmology conditions

Your child's ability to see the world depends on healthy eyes. At PSV, our pediatric ophthalmologists are experts at diagnosing and treating complex eye problems, congenital disorders and rare eye conditions, such as strabismus, childhood cataract and glaucoma.

We offer comprehensive care for patients of all ages, from newborns to young adults.

Leaders in children's eye care: Our program at Children's National Health System (CNHS) and thus PSV, was the first hospital-based pediatric ophthalmology department in the nation. We have a long history working with complex eye conditions and are a recognized leader in the screening and treatment of strabismus, congenital cataract and glaucoma, and retinopathy of prematurity, a disorder that affects premature infants.

Precise diagnosis: Finding the best treatment for your child starts with an accurate and in-depth diagnosis. We are experts in recognizing rare and complex eye problems in newborns, infants and children.

Expertise in rare disorders: Our pediatric ophthalmologists have extensive experience in the diagnosis and treatment of lens abnormalities and childhood cataract, a rare condition that affects only 0.4 percent of children and can be easily misdiagnosed. We are also among the few centers that manage infantile glaucoma, another rare but very serious eye disease.

Specialized programs: Our team approach to care allows us to provide the most comprehensive program in the metro area, with several sub-specialized clinics:

Pediatric Retina

Orbital and Oculoplastics

Cornea

Neuro-Ophthalmology

Ophthalmic Genetics

Our Ophthalmology Specialists

Mohamad Jaafar, MD
*Medical Director of
Ophthalmology*

Benjamin Martin, MD
Susana Chung, PA-C
Kelly Crown, PA-C
Samantha Leahy, PA-C
Eleanor Preta, PA-C

Quality Improvement Initiatives:

- Improvement timing of imaging for patients with Musculoskeletal (MSK) infection
- Treatment pathway with radiology to reduce wait times
- Decrease length of time from order to imaging study - The turnaround time for urgent MRIs for septic hip evaluations in the emergency room has notably decreased and the quality of service for urgent MRI for septic hip imaging in children has improved significantly.

Otolaryngology

High level of experience and expertise in treating pediatric ENT disorders.

International leaders in the field of otolaryngology and a local, national, and international referral center for children with ear, nose, and throat disorders.

ENT services include:

Full spectrum of services. From the basic to the most complex, our team provides every aspect of ENT care. Whether we are managing chronic ear infections or performing advanced procedures to treat hearing loss, we have the resources and skills to give children the care they need.

Reputation. Our team includes internationally recognized experts. Due to our experience and high volume, we are a referral center locally, nationally and internationally.

Pediatric specialists. Our ENT surgeons are fellowship-trained in pediatric otolaryngology, the highest level of training available. In addition to our surgical expertise, we are also the only center in the region to guarantee 24/7 access to a pediatric anesthesiologist to care for all of your child's sedation and pain management needs.

Ongoing research. *Our team actively participates in research in the field of otolaryngology, bringing the latest techniques and treatments to your child's bedside.*

Pediatric and Adolescent Gynecology

Comprehensive care for patients with pediatric and adolescent gynecology related conditions

The Pediatric and Adolescent Gynecology Program at PSV focuses on the diagnosis, medical, and surgical management of female reproductive health problems from birth through young adulthood.

Some of the services provided by the program include management of:

Abnormal periods (heavy or infrequent)

Painful periods

Ovarian cysts

Pelvic masses

Vaginal and vulvar abnormalities (irritation, masses, lacerations)

Anomalies of the female reproductive tract (vagina, cervix, uterus, fallopian tubes and ovaries)

Collaborative Care

The following multidisciplinary clinics are available for specialized and collaborative care:

Pediatric and Adolescent Gynecology and Endocrine Clinic

Clinic for Abnormal Menses/Bleeding Disorders and other complex hematology/gynecologic concerns

Available treatments and services

Age appropriate gynecologic evaluation

Medical treatments suitable for stage in puberty

Minimally invasive surgical approach

Minor procedures at PSV Ambulatory Surgery Center

Surgical procedures at Inova Fairfax Hospital

Our Pediatric and Adolescent Gynecology Specialist

Rachel Casey, MD
*Medical Director of
Pediatric and Adolescent
Gynecology*

Achievements:

- Multidisciplinary clinic combining hematology and gynecology
- Gynecology services extended to the Ashburn location

Clinical Achievements

PSV Stats to Highlight

92% Of the parents were likely to recommend PSV overall

85% Of the parents were likely to recommend their provider

ASC Stats to Highlight

99% Of the parents were likely to recommend the PSV-ASC

97% Of the parents rated the PSV-ASC a 10/10

Our lab team in the Center for Cancer and Blood Disorders (CCBD) passed their Clinical Laboratory Improvement Amendments (CLIA) inspection with 0 citations! This is a huge accomplishment as it is very seldom that a lab gets through an inspection with zero citations.

New Services

- Ambulatory Blood Pressure Monitoring (ABPM)
- Food For Others/RX For Food
- Perinatal Brain Injury (PBI) Clinic
- Harmony Clinic
- Migraine Infusions
- Clinic for Abnormal Menses/Bleeding Disorders and other complex hematology/gynecologic concern

Existing Services

- Haywire Club
- Headache Program
- ImproveCareNow - IBD & Celiac
- GI Tubes
- Polycystic Ovarian Syndrome (PCOS)

“Fall into CME” NP/PA Education Day 2018

PSV hosted its first “Fall Into CME” NP/PA Education Day on Friday, October 5th at the Inova Fairfax Hospital Physicians Conference Center. There were 70 guests, including many local nurse practitioners, physician assistants, and primary care physicians.

Presenters Included:

William McClintock, MD (Neurologist):
Migraine in Children and Adolescents.

Karen Harriman, NP (Endocrinology):
Multifaceted Approach to Diabetes Care.

Robyn Morrissette, PA-C (Allergy & Immunology): Up to Date on Food Allergies.

Peggy Vollstad, PA-C (Neurosurgery):
Pediatric Neurosurgery.

Kathleen Scarbalis, MPAS, PA-C (Hematology & Oncology): The Abnormal CBC: Keep or Refer.

Ian Leibowitz, MD (Gastroenterologist):
Abdominal Pain in Children.

Annual Mohsen Ziai Pediatric Conference

11 PSV physicians presented specialty-specific talks at Inova Childrens Hospital’s 12th Annual Mohsen Ziai Pediatric Conference, November 2-3.

- Rachel Casey, MD (Pediatric and Adolescent Gynecology)
- Rupa Dainer, MD (Ambulatory Surgery Center)
- George Gantsoudes, MD (Orthopaedics)
- Rebecca Levorson, MD (Infectious Diseases)
- Darlene Mansoor, MD (Allergy and Immunology)
- Leon Moores, MD (Neurosurgery & Chief Executive Officer)
- Katherine Moyer, DO (Infectious Diseases)
- John Schreiber, MD (Neurology)
- Patricia Seo-Mayer, MD (Nephrology)
- Natalie Sikka, MD (Gastroenterology)
- Marta Waberski, MD (Genetics)
